PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing and building scalable web applications using .NET Core, Angular, and Microsoft Azure. Strong background in RESTful APIs, SQL Server, and enterprise financial systems. Experienced in developing secure, high-performance applications, optimizing database queries, and integrating third-party accounting platforms. Proven ability to collaborate in Agile teams and deliver reliable solutions aligned with business requirements.

PROFESSIONAL EXPERIENCE

Technomark Solutions, Ahmedabad, India

- Executive Full Stack Developer [Apr 2025 - Feb 2026]
- Jr. Full Stack Developer [Jul 2023 - Apr 2025]
- Full Stack Intern [Jan 2023 - Jun 2023]

Astral Ltd, Ahmedabad, India

- Executive [March 2026- Present]

TECHNICAL SKILLS

Engineering Stack:

- **Backend:** .NET Core Web API, .NET, C#, Microservices, Azure Function, RESTful APIs
- **Frontend:** Angular, TypeScript, JavaScript, HTML5, SCSS
- **UI Frameworks:** Angular Material, PrimeNG, Bootstrap, Tailwind CSS
- **Familiar:** React.js, Node.js, Python, Java

Database, Cloud & Tools:

- **Database:** Microsoft SQL Server, MySQL, Firebase Realtime Database
- **Data Handling:** Stored Procedures, Query Optimization, Performance Tuning
- **Cloud:** Microsoft Azure (App Services, Azure Functions, BLOB Storage)
- **Tools:** Visual Studio, Visual Studio Code, Git, Postman, Swagger, Android Studio, PyCharm

EDUCATION

Master of Computer Applications (MCA)

- GLS University
- Location : Ahmedabad, Gujarat
- Graduated: June 2023

Bachelor of Computer Applications (BCA)

- Maharaja Krishnakumarsinhji Bhavnagar University (MKBU)
- Location: Bhavnagar, Gujarat
- Graduated: April 2021

LANGUAGES

- English | Hindi | Gujarati

KEY PROJECTS

BI – Business Intelligence Platform (PathQuest BI)

Pathquest Solutions

Role: Full Stack Developer

Tech: .NET Core, Angular, Entity Framework (DB First), MS SQL Server

- Built and enhanced an enterprise BI platform delivering real-time financial and accounting insights.
- Designed a multi-tenant database architecture with company-wise isolated databases for scalability and security.
- Developed backend services using .NET Core and Entity Framework (Database First).
- Implemented financial reports (balance sheet, cash flow) with support for 4-4-5 and 4-4-4 fiscal calendars.
- Developed budgeting and variance analysis features for actual vs planned comparisons.

AP – Accounts Payable Automation

Pathquest Solutions

Role: Backend Developer

Tech: .NET Core, Azure Functions, Worker Services, MS SQL Server

- Architected a scalable backend system for high-volume accounts payable automation.
- Integrated Sage Intacct, Xero, and QuickBooks Online (QBO) for real-time financial synchronization.
- Automated bill, payment, and PO approval workflows, reducing manual effort and processing time.
- Implemented SSO authentication, cloud document integrations, and email notification services.
- Optimized backend services and SQL queries for performance and reliability.

ITR – Income Tax Returns Platform

Technomark Solutions

Role: Full Stack Developer

Tech: Angular, TypeScript, HTML5, SCSS, .NET 6

- Developed a responsive web-based ITR application for a Japanese client.
- Built Angular UI components with focus on usability and responsiveness.
- Implemented Japanese localization, dynamic questionnaires, and system notifications.
- Delivered features aligned with client requirements and project timelines.

PMS – Productivity Management System

Technomark Solutions

Role: Backend Developer

Tech: .NET, Azure Functions, MySQL

- Developed a productivity tracking system with role-based access control (RBAC).
- Implemented time logging, client query modules, and automated background jobs using Azure Functions.
- Built performance dashboards providing real-time visibility for management.

Tax Automation for QuickBooks Online (QBO)

Role: Full Stack Developer

Technologies: Angular, .NET Core, MySQL

- Integrated QuickBooks Online OAuth for secure authentication and real-time data access.
- Developed an Excel import module with advanced validation and error handling.
- Automated reversal entries and bulk Chart of Accounts (COA) operations, reducing manual data entry effort by ~80%.
- Improved accuracy and efficiency of tax-related financial workflows.

Emo-Music – Emotion-Based Music Recommendation System

Role: Developer

Technologies: Python, OpenCV, DeepFace, Spotify API

- Developed an AI-driven music recommendation system that analyzes real-time facial expressions to detect user emotions.
- Implemented computer vision techniques for face detection and emotion recognition using OpenCV and DeepFace.
- Integrated Spotify API to generate personalized music recommendations based on detected emotional states.
- Designed the system to deliver real-time, emotion-aware user experiences through automated content selection.
